I want to take a specific sheet and copy the formulas from that sheet to another sheet and then save the document to the desktop. I am struggling with the syntax of this. Please help. For instance, say sheet name is "sheet1" and I want to copy the formulas in A1, B1, C1, D1, E1, F1, G1, H1, I1, J1, K1, L1 and M1 from sheet1 to sheet2 in cells A2, B2, C2, D2, E2, F2, G2, H2, I2, J2, K2, L2 and M2. A: You need to use the WorksheetFunction.Evaluate method. You need to provide the full path to the cell to which you want to copy the formula. And you need to do it after having copied all the necessary data to the cells with the formulas. For example: sheet2.Range("A2").Formula = _ WorksheetFunction.Evaluate("Sheet1.A1") Sheet2.Range("B2").Formula = _ WorksheetFunction.Evaluate("Sheet1.B1") Sheet2.Range("C2").Formula = _ WorksheetFunction.Evaluate("Sheet1.C1")
