It then optimizes data transfer by means of Traffic Shaping." Version : 9.04 Build 2051 ; License: No License; Category: Productivity Tools ; Platform: Windows; cFosSpeed 9.04 Build 2051 full.zip cFosSpeed 9.04 Build 2051 Final is a network driver, which attaches itself to existing Internet connections. It then optimizes data transfer by means of Traffic Shaping. It can process a range of different protocols and provides features such as real-time channel monitoring and statistical reporting. You can easily limit upload and download speeds. Version : 9.04 Build 2051 ; License: No License; Category: Productivity Tools ; Platform: Windows; Click "Download" and choose the file you want to download cFosSpeed 9.04 Build 2051. Download cFosSpeed 9.04 Build 2051 from the link below and then install it. You can also download cFosSpeed 9.04 Build 2051 from other websites cFosSpeed 9.04 Build 2051 full.zip I have just done a complete reinstall on my new Windows 7 PC, and, after installing cFosSpeed, I am very impressed with the results, and have decided to not install any other applications on this PC, because cFosSpeed is doing so well for me. I am a total novice, and don't know much about computers. So, as I said, I have a very new PC, so I can't really complain about any of the little issues with it, that some of you may be able to overcome. cFosSpeed 9.04 Build 2051 full.zip Addendum Note 1: cFosSpeed can process the following protocols: TCP/IP, SMTP, POP3, FTP, Socks5, UPnP, MSNP, HTTP, HTTPS, PPP and RDP Note 2: cFosSpeed can process only fixed 2d92ce491b
