Pakistan Q: Random Variables Y is
of integral form, $P(Y > 0) > 0.5$

Let Y be a random variable that has probability density function (pdf) $f(y)$ and cumulative distribution function (cdf) $F(y)$.

If $P(Y > 0) > 0.5$ then what is the pdf of Y ? I am not sure how to approach this problem, is it true that $P(Y > 0) = 0.5$ and therefore $f(y) = 0$? A: Here is a hint:

$$\begin{aligned} P(Y \leq 0) &= \\ P(Y > 0)P(Y \leq 0 \mid Y > 0) + \\ P(Y \leq 0) &+ P(Y > 0) > 0.5 \end{aligned}$$

where the third line follows from the first two lines. Q: GWT 2.4 `uibinder:bind()` returns

empty html I'm using gwt 2.4 and the uibinder. This is my current problem: I want to have a style in a file, that is loaded by the uibinder and contains a div with absolute positioning. I want to bind that div with the ui:composition id "content". 2d92ce491b
