I am trying to make a very simple border coloring. I have two buttons. When I click the second button, the background color of the second button should change. When I click the third button, I want to make the background color of the third button change. There are two sets of this: I want to change the back color, I want to change the border color. Here is the code I have: public MainWindow() { InitializeComponent(); Clicked = new Button { Width = 100, Height = 50, Content = "Click" }; Clicked.Click += Clicked_Click; Clicked2 = new Button { Width = 100, Height = 50, Content = "Click2" }; Clicked2.Click += Clicked2_Click; } private void Clicked_Click(object sender, RoutedEventArgs e) { Background = new SolidColorBrush(Color.FromArgb(5, 0, 0, 0)); } private void Clicked2_Click(object sender, RoutedEventArgs e) { Background = new SolidColorBrush(Color.FromArgb(5, 0, 0, 0)); } The first button doesn't work. The second button works, but the background color of the second button doesn't change, so I don't understand why the first button doesn't work. A: Please check this: public MainWindow() { InitializeComponent(); Clicked = new Button { Width = 100, Height = 50, Content = "Click" }; Clicked.Click += Clicked_Click; Clicked2 = new Button { Width = 100, Height = 50, Content = "Click2" }; Clicked2.Click += Clicked2_Click; } private void Clicked_Click(object sender, RoutedEventArgs e) { Click 2d92ce491b
