Acer is the third largest PC vendor in the world. The company is one of the best known for making computers and laptops. Its previous models of laptop, the Aspire 13 and Aspire 15 series, were hugely successful. The company also made one of the first ultrabooks, the XR341P. It now sells three models of PC, the Aspire XR (desktop), Aspire S (notebook) and Aspire E (ultrabook). In 2012, Acer launched its first consumer product to feature an operating system based on the Linux kernel called Acer Aspire One AOA150-X131H. The Acer Aspire One AOA150-X131H was released in August 2012 and was met with positive reception due to its unique design. It is noted to be the first Acer model to feature a touch screen and hybrid graphics. It was succeeded by the Acer Aspire One AOA150-X171H. Windows 8. Windows 7 — The company announced plans to port Windows 7 to its laptops in mid-2012. Windows 8 was already available for the Aspire 15 and Aspire S notebooks. Source: AcerBEIJING — A Chinese firm has developed an application that can allow buyers to scan a live 3-D image of a traditional wedding banquet using their smartphones, as if they were laying eyes on the feast. The visual, which resembles a short horror movie, consists of a high-definition image of a banquet with a detailed map and multiple-layer images of dishes like beef, chicken, mutton, pork and vegetables as the guests eat. The application, developed by Xiongmai, a Beijing-based information technology company, can also convert the 3-D video into a 2-D video that can be viewed on the buyer's phone, and can be automatically uploaded to the Internet. "This is a novel and practical application of 3-D imaging technology," said Liang Zengqi, Xiongmai's vice president. Xiongmai has developed several applications using a 3-D technology that allows users to manipulate a real-life image on a computer screen or a smartphone. The company said the three-dimensional video technology, combined with its other applications, could provide new ways to share information. The 3-D video can be used to depict changes in an event, such as the quantity of each dish or the portion size, 2d92ce491b
