I have the new keygen, but I have no idea how to use it. Thanks in advance!□□▽□□. A: You cannot. It does not exist. Delphi 2014.1 keygen is not the official key generator, it is a fan-made app. It is not signed and it does not come with a license key. You cannot use it. It is a fake product. There is no such key on any official source. If you have a legit key, I would suggest to contact support. Q: How can I create database without any user accounts in SQL Server 2014 Express I am trying to create a database on a server (SQL Server 2014 Express) where there are no user accounts and I don't want any to exist. I have a database I wish to delete for various reasons, so I want to do this from within Management Studio Express. I've tried to change the password and I cannot do so. I've tried to change the login, but I don't have a login. I've tried to do it as a system admin, and it keeps telling me that I do not have the right permissions. I've seen a bunch of suggestions to do this, but most are suggestions to go to SQL Server Configuration Manager > SQL Server Services > "MSSQLSERVER" and change the Instance Name and Local Administrator Password, which I'm not having any luck with. A: Open a Command Prompt with administrator privileges and type: sqlcmd -E -S "M
