The Dark Crystal The HBO film adaptation of Stephen Fry's fantasy novel takes place on a distant planet whose people have lived in darkness for centuries. When a fierce storm strikes, the brilliant and arrogant Gelflings - aka the Dark Ones - are inexplicably turned to stone. Only a kindly Gelfling named Jen, who had been born blind, survives the nightmarish transformation. Jen uses a vial of the Gelfling Elixir - or "Eye of the Mind" - the only antidote to darkening - to restore her companions. In the process, Jen and the Gelfling ambassador, Razum, a young blind girl who joined the Gelflings when her village was destroyed, are sucked into a world of magic, adventure and politics. What Jen finds in this world will change her forever.
