SoftwareSolutions Technologies, a pioneer in the creation of multimedia products for the healthcare and medical industry, has released WiNA, the first practical and affordable image archiving and medical reporting software designed specifically for the neonatal community. With innovative features such as a fully integrated TIFF format library and a WYSIWYG report editor, WiNA is designed to be easy to use and offers a unique option for medical imaging. WiNA Overview The birth of a child is one of the happiest events in a family's life, but it can also be a stressful time due to the number of images and reports generated during hospitalization. Coupled with the added inconvenience of hauling bulky folders of prints from NICU to NICU or from hospital to hospital, there is no easier way to document a NICU hospitalization than with WiNA. WiNA is a comprehensive image archiving and reporting solution. The software is designed to provide a convenient way for NICU nurses to enter the medical history of the infant. The program is designed to streamline the creation of the initial NICU information and hospital reports that are then used for billing. The project is designed to provide a user-friendly and cost-effective solution for NICU nurses and a way to better document the medical history of the infant. A Nifty Free Print Ordering Program WiNA's unique functionality allows you to have a simple ordering process for your NICU staff. This is made possible through the inclusion of a printable order form that is built-in to the software. The form can be created and printed from within the program and the print orders are generated from the data entered. This is a unique feature of WiNA that sets it apart from other archiving and reporting software. WiNA is a fully integrated program designed to help you document and track the medical history of the infant. WiNA provides a comfortable viewing and printing experience and an easy way to create a
