However, when I'm logged in, the Magento admin interface uses example.com, while my mobile app has HTTPS certificate, and uses for my API calls. In my Apache's httpd.conf, I have this: ServerName example.com RewriteEngine on Redirect 301 /magento/ RewriteCond %{HTTPS} off RewriteRule. [L,R=301] ServerAdmin admin@example.com DocumentRoot /var/www/example.com/html/ ErrorLog /var/www/example.com/logs/error.log CustomLog /var/www/example.com/logs/access.log combined I have also tried the following, with no results: RewriteRule (.*) [R=301,L] How can I use for logged-in users and for non-logged-in users? Thanks! A: You can either have the condition be in an HTTPS rewrite for the login area of the site, or you can add an additional HTTP rewrite inside the VirtualHost to redirect the rest of the site: ServerName example.com ServerAlias www.example.com RewriteEngine on RewriteCond %{HTTPS} off RewriteRule ^/(?!(magento)/)(.*)\$ [R=301,L] ServerAdmin admin@example.com.
