## Us Web Coated Swop V2 Download 33

There is only one answer to this question: you have to ask them which CMYK profile they want you to use. Don't ask about customer relations. Don't ask what they want in terms of color. They have already agreed to this. If you don't know what they want, you'll just play with their colors without thinking about their goals. It won't work. If you don't know their colors, you won't know how they use that color. If you don't know how they use color, you won't be able to understand how they use your color scheme. If you don't know how they use their color scheme, you can't show how you use them.
