wallpapers with special effects. See your Windows desktop expand to fit a new image, then shrink back to its original size and format in one easy step. DreamScene XP is a powerful utility designed to change the desktop of your computer to a colorful 3D wallpaper with effects and motion. Our program is designed for persons living in countries where the view is obstructed by an electromagnetic field emitted by the dominant television networks and the other media. These fields, called Electromagnetic Field (EMF), have generated a deep concern among the citizens and have led to legislation to provide greater protection from them. This legislation, however, has not yet been introduced into law. In fact, the World Health Organization (WHO) has issued a warning regarding the possible health effects of such high levels of exposure to these fields (high levels of exposure mean that a person spends more than 60 hours a week watching TV or using a computer, etc.). In our country, where the exposure to these fields is very high (almost 100 hours per week), our b7e8fdf5c8

DreamScene XP is an interactive video that can be used as a background for your Windows XP desktop. At first setup, this wizard will ask for information to select your video and size. DreamScene XP allows users to adjust two settings that will determine the length and appearance of the video. The length of time it will play and the fade in/out times. After these things are set, it will ask for the path to the video file that you would like to use. This feature is great for watching videos online or just incorporating a video file into your own personal customization theme. DreamScene XP allows users to create their own animations. DreamScene XP is a powerful and easy to use program that supports multiple videos and background areas.
